

WHAT'S HOTTER THAN THE FIELD OF CYBERSECURITY?

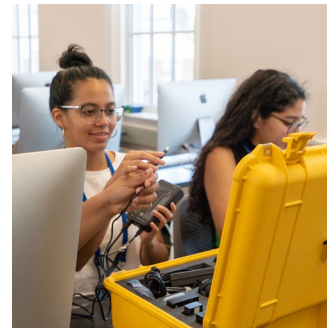

The opportunity to enter it while you're still in high school.

CONNECTICUT INSTITUTE OF TECHNOLOGY

With the University of New Haven's **Technology | Innovation | Experience | Discovery (TIED)** program, you can start launching your cybersecurity career from high school. The Connecticut Institute of Technology – which resides within our Tagliatela College of Engineering – is offering three courses that let you seize the opportunity early to explore the in-demand fields of cybersecurity and computing and envision the career your future could hold.

Apply now to take your first course in Fall 2021! Courses are taught live via virtual (remote) instruction with up to 20 other students. Through this experience, you will also

- earn transferable college credit to the University of New Haven, which will save on tuition
- build connections with current students and faculty
- receive invitations to exclusive events and on-campus experiences to learn more about the University of New Haven

- connect with industry professionals, who will give you the inside story on the fields of cybersecurity and computing
- benefit from a simplified admissions process to earn acceptance into the University of New Haven and entry into the Connecticut Institute of Technology and the Tagliatela College of Engineering

The fields of cybersecurity and computing are looking for warriors to fight hackers and other bad actors. Here's your opportunity to join the fight early.
